Tourism

Prior to the outbreak of the COVID-19 pandemic, the South African tourism sector's contribution to economic output and employment had been flat on pre-2008 financial crisis levels. In addition, the global tourism growth had outstripped local growth performance over the past decade. The COVID-19 pandemic has compounded these challenges.

South Africa's quarterly economic performance in 2020 showed a strong correlation with the quarterly performance of the tourism sector. This relationship underscores the tourism sector's impact on the wider economy. The devastation of the tourism sector by the COVID-19 pandemic has been reflected on the poor performance of the wider South African economy for the year 2020.

Globally, during the height of the pandemic, in 2020, the World Travel and Tourism Council (WTTC) estimated that 174 million travel and tourism jobs were at risk. However, as countries are getting better at managing the pandemic, the WTTC's latest analysis shows an optimistic scenario that predicts the revival of as many as 111 million jobs which would still be 17% below 2019 figures, accounting for 54 million fewer jobs. This shows that there is optimism around the world that the tourism sector will recover very fast.

The Department of Tourism seeks to contribute towards placing South Africa's tourism sector on a growth trajectory that fully realises the country's vast and diverse tourism potential. Tourism has the potential to make a significant contribution to the South African economy and it is targeted by government as one of the industries for future economic growth in the country. Tourism therefore is regarded as a potential sector where large-scale employment opportunities can be created.

The mandate of the Department of Tourism, as outlined in the Tourism Act, 2014 (Act 3 of 2014), is to promote the growth and development of the tourism sector; promote quality tourism products and services; provide for the effective domestic and international marketing of South Africa as a tourist destination; enhance cooperation and coordination between all spheres of government in developing and managing tourism; and promote responsible tourism for the benefit of South Africa and for the enjoyment of all its residents and foreign visitors.

In recognition of tourism as a national priority with the potential to contribute significantly to economic development, the *1996 White Paper on the Development and Promotion of Tourism in South Africa* provides for the promotion of domestic

and international tourism. The National Tourism Sector Strategy (NTSS) provides a blueprint for the sector to meet the growth targets contained in the National Development Plan (NDP). The NDP identifies tourism as a labour-intensive sector with the potential to stimulate economic growth and transformation. This vision is given expression by Priority 1 (economic transformation and job creation) of government's 2019 – 2024 Medium Term Strategic Framework, with which the work of the Department of Tourism is directly aligned.

Over the medium term, the Department of Tourism will focus on the rejuvenation of the industry as part of the National Tourism Recovery Plan. This will involve intensive work, in partnership with the police and other relevant stakeholders, to enhance tourism safety by introducing national norms and standards for safe tourism operations based on globally recognised biosecurity protocols.

A critical part of the recovery effort is to ensure that, while travel volumes have almost ground to a halt, the supply side of the sector is protected and rejuvenated. Tourism infrastructure development and maintenance work on products and attractions will create job and small, medium and micro enterprises (SMMEs) opportunities, in compliance with the Public Finance Management Act, 1999 (Act 1 of 1999). There is substantial scope for labour intensive work through construction and maintenance contracts to promote SMME development, Broad-Based Black Economic Empowerment (B-BBEE), involvement of women and youth, and local employment coupled with appropriate enterprise development. The programme measures the quality of product offerings, to enhance the visitor experience that will be implemented in the medium term in order to improve destination competitiveness.

This is expected to enable safe travel and rebuild traveller confidence. In addition, over the Medium Term Expenditure Framework (MTEF) period, the Department of Tourism will aim to stimulate domestic demand; introduce an e-visa programme for priority markets; and promote collaborative investment in the sector through measures such as ensuring the effectiveness of market-entry facilitation programmes. Examples of these include the Wine Service Training Programme and the Hospitality Youth Programme, which aim to provide young people with essential tourism skills that enhance the experience of visitors.

A key intervention to protect tourism supply is the implementation of a tourism infrastructure maintenance

programme of state-owned assets. The planned initiative involves destination enhancement of South African tourism assets and infrastructure, making the country a diverse and unique tourism destination. The focus is on diversifying and enhancing tourism product offerings, with specific reference to improving and upgrading experiences at key tourism sites such as at world heritage sites, national heritage sites, national parks, botanical gardens, indi-atlantic route and rural/township precincts.

Legislation and policies

The Department of Tourism operates under the following legislation and policies:

- The Tourism Act of 2014 aims to promote the practise of responsible tourism for the benefit of the country and for the enjoyment of all its residents and foreign visitors; provide for the effective domestic and international marketing of South Africa as a tourist destination; promote quality tourism products and services; promote growth in and development of the tourism sector, and enhance cooperation and coordination between all spheres of government in developing and managing tourism.
- *The White Paper on the Development and Promotion of Tourism in South Africa, 1996*, provides a framework and guidelines for tourism development and promotion in South.
- The NDP is the 2030 vision for the country. It envisions rising employment, productivity and incomes as a way to ensure a long-term solution to achieve a reduction in inequality, an improvement in living standards and ensuring a dignified existence for all South Africans. The NDP recognises tourism as one of the main drivers of employment and economic growth.
- The Re-imagined Industrial Strategy identifies tourism as one of the seven national priority sectors.
- The NTSS guides the strategic development and growth on the tourism sector in pursuit of the NDP targets.
- The Tourism Sector Recovery Plan (TSRP) sets out interventions to ignite the recovery of the tourism sector, and to place it on path to long-term sustainability whilst contributing to the implementation of the Economic Reconstruction and Recovery Plan (ERRP).

Budget and funding

Before the COVID-19 pandemic, the Department of Tourism's 2020/21 budget allocation was R 2.480 billion, of which R1.304 billion was for transfers and subsidies. The department's revised budget allocation was R 1.480 billion, of which R505 million was for transfers and subsidies.

The department has a total budget of R7.4 billion over the medium term. Transfers to South African Tourism (SAT) to market the country as a tourism destination of choice account for an estimated 53.6% (R3.9 billion) of this amount over this period. Cabinet-approved budget reductions of R606.4 million over the MTEF period will be effected on goods and services (R125.7 million), transfers and subsidies (R325.1 million) and compensation of employees (R155.5 million).

To support transformation objectives, despite these reductions, the department will reprioritise a targeted R540 million over the medium term from the Destination Development programme to the Tourism Incentive subprogramme in the Tourism Sector Support Services programme.

This will be used to pilot the Tourism Equity Fund (TEF), which is intended to support commercially viable black-owned enterprises to acquire shares in tourism enterprises; promote the visibility of SMMEs and facilitate the development of community assets and ownership patterns. Expenditure in the subprogramme accounts for an estimated 13.4% (R992.3 million) of the department's total budget over the medium term.

COVID-19 impact on the South African tourism industry

The value of tourism in supporting policy imperative of job creation remains, however, even more fundamental. Hence the South Africa's Economic Survey 2019/20 notes that tourism should be pursued aggressively by the country as a key part of overall COVID-19 recovery efforts. The survey notes that the tourism sector needs support to survive the effects of COVID-19. Development of tourism and boosting transport infrastructure investments can contribute to economic growth and job creation during the recovery in the medium-term.

This requires, amongst others, high level of government involvement in the economy, removing of barriers to domestic and foreign entry and complex rules for licences and permits.

South Africa has not been spared from the near collapse in international tourist arrivals. Hotel occupancies have declined significantly, leading to some small and large hoteliers being forced to close down. Airlines had significantly curtailed operations and many tourism attractions are either closed or operating far below capacity.

At the beginning of the COVID-19 pandemic, several support mechanisms were put in place both at national and provincial level – to support tourism firms in distress. The Department of Tourism introduced the R200 million Tourism Relief Fund to support 4 000 businesses, and the R30 million Tourist Guides Relief Fund to support freelance or self-employed tourist guides.

While some of these measures are still running in some provinces albeit at a low scale, they are not nearly enough. For that reason, where required, support will be provided to tourism firms in distress in their effort to access part of the R200 billion Government-Backed Loan Guarantee Scheme. This will inform the Non-Financial Support Programme for tourism firms to be implemented in terms of the TSRP.

Plans are underway to implement a non-financial support programme that will provide businesses with access to compliance training resources, visitor experience optimisation tools, proposition and marketing support and recovery planning advisory.

On the other hand, the weak state of the local economy and job losses triggered by COVID-19 is impacting negatively on household disposable income, and thus limit the ability and affordability to travel. In October 2020, 92% of tourism businesses surveyed (in a collaboration between the International Finance Corporation, the Department of Tourism and Tourism Business Council of South Africa) reported a more than 50% decline in revenues compared to October 2019, and 36% of businesses indicated a total loss of revenue. About 78% of businesses reported that forward bookings held in October 2020 were at least 50% less than bookings held in October 2019, and 23% had no bookings. On occupancy/customer use, 88% of businesses surveyed indicated that in October 2020, this was down more than 50% compared to October 2019, and 38% indicated no occupancy.

A total of 58% of businesses were unable to service their debts; 61% were unable to cover fixed costs, 58% had reduced wages for more than 50% of staff, 40% had reduced wages for all staff; 28% had furloughed more than 50% of staff, and 12% had furloughed all staff, with 33% only having furloughed less than 10% of staff. About 18% of businesses had made more than 50% of staff redundant, 7% had made all staff redundant, with 33% not making any redundancies.

The survey also found that 23% of the respondents were not operating in October 2020, but planned to reopen, with 5% indicating that they were closed and would not reopen.

This necessitated collaboration between the public and private sector in developing a path to recovery, resulting in the development of the TSRP, which is aligned to the ERRP, in particular the programme's priorities of mass employment creation, infrastructure investment, green economy interventions, gender equality and the inclusion of women and youth, as well as skills development.

Tourism Sector Recovery Plan

The TSRP seeks not only to return the tourism sector's performance to levels it reached before the outbreak of COVID-19, but also to place it on a long-term sustainable growth trajectory, leveraging on South Africa's vast and diverse tourism potential. It is anchored on three interlinked pillars – protect and rejuvenate supply, reignite demand and strengthen

capability for long-term sustainability. It outlines specific interventions under each strategic theme, with timeframes and lines of accountability. These interventions will be implemented simultaneously, taking into account the effects of the stop and start cycles that the sector will be expected to deal with in the short-to-medium term as the virus evolves bringing with it possible new waves and strains.

Simultaneous implementation of the interventions in the TSRP means that efforts to rejuvenate and protect the supply side will be undertaken jointly with efforts to ignite demand; locally, regionally and across the globe. Furthermore, interventions undertaken in the current period will also be deliberately targeted towards ensuring the long-term sustainability of the sector.

While international travel will remain subdued for some time, work will begin, in line with recommendations in the ERRP, to build a bidding pipeline for the hosting of future conferences and mega events. The reignition of demand has to be met with sufficient supply. In this regard, a correct product pricing mix is a key to addressing both international and domestic demand. This includes the costs and availability of the transport enabler that allows tourists to get to and move within destinations. While South Africa has no shortage of tourism products, both public and private sector owners will have to consider how these products are packaged and priced for the domestic and regional consumer.

In this regard, the Department of Tourism established a pilot on the budget resort concept and brand – an initiative to meet the anticipated changes in domestic and regional demand. This initiative is the incorporation of prioritised initiatives – from tourism masterplans to the District Development Model plans for various districts. The key risks related to this initiative pertain to the lack of stakeholder buy-in, resourcing and institutional arrangements.

The department will implement the publication of norms and standards for safe operations in the sector across the value chain, to enable safe travel and rebuild traveller confidence. In addition, the department will encourage the adoption of and monitor the implementation of these norms and standards by businesses across the value chain.

Guided by South Africa's three-phased approach to the roll-out of the COVID-19 vaccination programme, the TSRP's key assumption was that the country will reach herd immunity – vaccination of 67% of the population – by the end of 2021.

Linked to this was the assumption that as South Africa reaches herd or population immunity, this would relieve the pressure on the tourism brand and boost efforts to position the country as a safe tourism destination. Another assumption is that domestic travel will pick up in the short-to-medium term; serving as a leading indicator of South Africa's readiness to safely receive inbound visitors. This may not be the case considering the weak state of the economy and depleting household disposable income.

The stop and start cycles that will be experienced in the sector, also pose a risk to its recovery. The reduced capacity of airlines and routes especially from major source markets could also pose a risk for the tourism recovery effort.

Tourism Equity Fund

In January 2021, government launched the R1.2 billion TEF aimed at creating an inclusive and growing tourism sector by supporting entrepreneurship and investment on the supply side of the tourism sector. Due to the COVID-19 pandemic many jobs in the tourism and associated sectors in the value chain have been shed since 2020. Tourism directly accounts for 2.9% of South Africa's gross domestic product and 8.6% indirectly. It supports about 1.5 million direct and indirect jobs.

The fund is aligned with the NTSS 2016 – 2026, which places significant emphasis on a transformative and inclusive tourism economy. It is informed by the recognition that the capital-intensive nature of the industry prevents many black-owned tourism enterprises from growing and developing. By providing access to finance for black-owned, commercially viable tourism projects, the fund intends to address this challenge.

As a combination of grant funding, concessionary loans and debt finance, the fund will cater to the specific needs of black-owned businesses to acquire equity, invest in new developments or expand existing developments. The fund was established by the Department of Tourism in partnership with the Small Enterprise Finance Agency (SEFA) as a new financial support mechanism to stimulate investment and transformation in the tourism sector. The fund will offer a combination of debt finance and grant funding for large capital investment projects in the tourism sector.

The Department of Tourism intends to launch the TEF in partnership with the SEFA for an initial pilot phase period of three years, with a view to promote the participation of black enterprises within the tourism industry. The TEF will be

capitalised by the Department of Tourism to the value of R540 million over three years. This will be used as a capital injection by means of a grant contribution towards funding acquisitions and development and expansion projects by black tourism industrialists up to a maximum of R20 million per enterprise. This capital injection will be used to leverage at least 50% additional funding per transaction. The fund will focus on the majority black-owned (51%) and black management-controlled tourism enterprises.

The implementation of the TEF should be done in a manner that addresses the reconstruction of the sector, as well as advancement of transformation through enabling expanded participation of black people, women, youth and people with disabilities in the sector. This initiative brings together government, development finance institutions and commercial banks to pull resources together for ease of access to capital and operational funding. Its success will see a relative degree of inclusivity in the sector, which will emerge after full recovery. The TEF will be implemented, as part of ensuring that the sector that emerges after recovery is moving towards inclusivity in its form.

Entity South African Tourism

The Tourism Act of 2014 mandates the South African tourism industry to market South Africa, internationally and domestically, as a preferred tourism and business events destination; ensure that tourist facilities and services are of the highest standard; and monitor and evaluate the performance of the sector.

Over the medium term, the SAT will focus on responding to the National Tourism Recovery Strategy. Primary activities will include revitalising South Africa's reputation as a premier travel destination; and protecting, defending and entrenching current markets while growing new strategically identified markets to drive domestic business travel and meet the rising demand for domestic leisure travel.

To revitalise South Africa as a premier destination brand, the entity has set aside R3 billion over the medium term. Expenditure is expected to increase from R1.5 billion in 2020/21 to R1.6 billion in 2023/24. Transfers from the department account for an estimated 90.1% (R3.9 billion) of total revenue. Other revenue is generated from tourism marketing levies, grading income, interest on investments and sundry income from events such as exhibitions.

Role players

Tourism Enterprise Partnership (TEP)

The TEP is a non-profit company that facilitates the growth, development and sustainability of small tourism businesses. This is achieved through a number of products and services that provide hands-on, step-by-step support and guidance, ultimately leading to improved product quality, operational efficiency and market reach.

Funding for the TEP's small tourism business development interventions is provided by the Department of Tourism as well as the Business Trust, the Tourism Micro-Enterprises Support Fund (a sister company that provides funding specifically for the support of micro-enterprises), global financial services company Credit Suisse, and the Eastern Cape Development Corporation.

Africa's Travel Indaba

Africa's Travel Indaba is one of the largest tourism marketing events on the continent's calendar and one of the top three "must visit" events of its kind on the global calendar.

It showcases the widest variety of southern Africa's best tourism products and attracts international buyers and media from across the world.

Africa's Travel Indaba is owned by the SAT and organised by Synergy Business Events. It has won various awards for Africa's best travel and tourism show, presented by the Association of World Travel Awards. Africa's Travel Indaba 2020 was postponed due to COVID-19 regulations which prohibited gatherings.

Meetings Africa

Meetings Africa is the continent's largest trade show for the business events industry. Meetings Africa has been lauded as the premier business event in this industry, showcasing the continent's diverse offering of services and products.

Positioned as "Advancing Africa Together", the sole ambition of the trade show is to contribute to the growth of Africa's potential as the world's fastest-growing and most sought-after business events destination.

Culture, Art, Tourism, Hospitality, and Sport Sector Education and Training Authority (CATHSSETA)

The CATHSSETA is one of the 21 sector education and training authorities established in 2001 under the Skills Development

Act, 1998 (Act 97 of 1998). It was formally known as the Tourism and Hospitality Education and Training Authority. Its mandate is to facilitate skills development within its subsectors through the disbursement of grants for learning programmes and monitoring of education and training as outlined in the National Skills Development Strategy.

The CATHSSETA operates in the following subsectors:

- Arts, culture and heritage;
- Conservation;
- Gaming and lotteries; and
- Hospitality.

Tourism Grading Council of South Africa (TGCSA)

The TGCSA is South Africa's only officially recognised and globally credible quality assurance body for national tourism products. It uses a star grading system for the evaluation of the quality of accommodation establishments.

Of the 11 categories of establishments from which travellers can choose (hotels, lodges, bed and breakfasts, country houses, guest houses, self-catering units, caravan and camping parks, backpackers and hosteling facilities as well as meetings, exhibitions and special events venues), establishments that have been graded by one of the TGCSA's accredited grading assessors will clearly display the TGCSA star insignia. The TGCSA star plaque and certificate guarantees quality and service excellence in line with internationally benchmarked standards.

Tourism B-BBEE Charter Council

The Tourism B-BBEE Charter Council's roles include:

- providing guidance on sector-specific matters effecting B-BBEE in entities within the sector;
- compiling reports on the status of B-BBEE within the sector for the Minister of Tourism and the BEE Advisory Council; and
- sharing information with sector members, approved accreditation agencies and the Minister of Tourism pertaining to B-BBEE in the sector.

Programmes and projects

Tourism Incentive Programme (TIP)

The TIP received a budget of R552.9 million over the medium term and will focus on supporting tourism attractions to enhance destination competitiveness. Underused and unused

public recreational facilities and resorts will be redeveloped as tourism destination sites.

Besides its job creation and economic growth outcomes, the TIP is aimed at the following:

- enhancing infrastructure facilities to maximise tourism benefits;
- promoting greater participation in tourism and leisure activities, particularly among low-income people and families;
- attracting private sector investment in those facilities;
- sector transformation; and
- addressing the challenges of uneven geographical spread of tourism products and seasonality.

The programme will further support SMMEs by assisting them to participate in local and international trade exhibitions, thus creating direct linkages with international tourism companies. The programme will start by focusing on creating better access to new markets and customers, encouraging greater participation in the grading system, and providing key tourist attractions with clean and renewable energy sources.

The TIP comprises the following:

- A subsidy towards the costs incurred by tourism establishments to participate in trade exhibitions and marketing roadshows. This will include a capped reimbursement towards predetermined expenses such as airfare, accommodation and exhibition fees for participation in marketing platforms supported by the SAT.
- Support for owners of establishments who want to be graded by the TGCSA in the form of a structured system of retroactive discounts or rebates on the assessment fee for grading. This aims to make grading more affordable for smaller businesses and encourage more establishments to become graded.
- A pilot project to retrofit facilities at state-owned destinations and attractions such as world heritage sites and national botanical gardens with renewable energy technology. This will guide the design of a programme to help make establishments, including those in the private sector, more environmentally sustainable.
- The TIP supports the objectives of South Africa's overall industrial policy, which includes creating jobs, building the local industrial base and transforming to a green economy.

Green Tourism Incentive Programme (GTIP)

The ongoing electricity supply challenges, combined with persistent drought conditions in many parts of South Africa,

poses a threat to sustainable tourism operations. Added to this, a greater awareness amongst tourists around the impact of climate change has led to growing market demand for responsible tourism experiences that supports environmental sustainability. In line with its responsible tourism development objectives, the Department of Tourism introduced the GTIP grant funding to assist private sector tourism enterprises to retrofit their facilities with efficiency solutions for energy and water usage.

This initiative will not only alleviate pressure on the electricity and water resources of the country and ensure an uninterrupted visitor experience for tourists, but will also reduce input costs and facilitate increased competitiveness and operational sustainability for tourism enterprises. The GTIP is managed by the Industrial Development Corporation on behalf of the Department of Tourism. In order to strengthen the programme, the partnership has also been widened to include the National Cleaner Production Centre (NCPC) and the SEFA.

Under the GTIP, qualifying applicants are eligible for the following:

- 90% of the cost for a new resource-efficiency (energy and water) audit or the full cost for reviewing an existing resource-efficiency audit conducted by the NCPC; and
- grant funding to qualifying small and micro enterprises on a sliding scale, from 30% to 90% (capped at R1 million per applicant) towards the installation of recommended water and energy efficiency measures.

Tourism Transformation Fund (TTF)

Transformation and more inclusive growth of the tourism sector remains a key priority for the Department of Tourism, in line with broader government objectives and legislation for B-BBEE. As part of its efforts to support sector transformation, the department partnered with the NEF to establish a dedicated capital investment funding mechanism to encourage capital investment by majority black-owned investors in the tourism sector. The TTF aims to use grant funding to stimulate accelerated sector transformation and more inclusive growth and is expected to give rise to a new generation of black-owned youth, women and community-based tourism enterprises that will take the sector to new heights.

The fund offers a combination of debt finance from the NEF and grant funding from the department for new and expansionary tourism development projects with majority black shareholding.

The TTF is managed by the National Empowerment Forum (NEF) and is capitalised by the Department of Tourism to the tune R77 million. The grant component will be capped at a maximum of R5 million per successful applicant to unlock investment.

In May 2021, government announced that the department would restructure the TTF to make it more responsive and accessible to entrepreneurs.

The Blue Flag is one of the world's most recognised voluntary eco-labels awarded to beaches, marinas, and sustainable boating tourism operators. To qualify for the status, a series of stringent environmental, educational, safety, and accessibility criteria must be met and maintained. To achieve Blue Flag status, 33 main criteria covering four aspects of coastal management have to be met. These four aspects are water quality, environmental education and information, environmental management, and safety and services.

The Blue Flag Programme is a recognised international accreditation initiative that acknowledges excellence in maintaining the highest standards of environmental management, safety, services and amenities. South Africa was the first country, outside of Europe, to introduce the Blue Flag Programme, in November 2001 in Cape Town.

The Wildlife & Environment Society of South Africa announced that a total of 58 Blue Flags were awarded for the 2020/21 Blue Flag season. They include 48 beaches, six marinas and four sustainable tourism boats across South Africa.

Market Access Support Programme

The cost and difficulty of accessing and engaging international travel buyers serves as a major barrier to unlocking growth potential of small tourism product owners and inbound operators. The aim of the Market Access Support Programme is to reduce the cost burden for small tourism enterprises to participate in selected international trade platforms and thereby improving their access to buyers in new and growth markets to unlock demand growth and allow market penetration.

The programme offers financial support to qualifying small tourism enterprises to participate in, and exhibit at selected international trade platforms. Relevant trade platforms (exhibitions and marketing roadshows) included in the programme are identified in consultation with the SAT. The support offered under the Market Access Support Programme typically includes contributions towards the cost of participation, accommodation and economy class return airfare for applicants approved for support. The cost of participation, including exhibition fees at a particular trade platform is paid upfront to the event organiser by the department on behalf of approved applicants.

Tourism Grading Support Programme

The Tourism Grading Support Programme was introduced to encourage wider participation in the tourism grading system and to reduce the cost burden of grading on small tourism enterprises. The programme also aims to stimulate an increase in conformity to quality standards in tourism that will enhance the overall visitor experience and improve South Africa's competitiveness as a tourism destination.

The programme offers discounts of between 80% and 90% on the cost of star grading assessment fees for accommodation establishments and meeting venues. The programme is administered by the TGCSA.

National Tourism Sector Strategy

The vision of the NTSS is to position South Africa as one of the top 20 tourism destinations globally. The overall goal of the strategy is to drive the tourism economy, enhance visitor experiences, position South Africa as a destination of choice and sustain good governance in the industry.

The key focus areas of the NTSS are arrivals, GDP and job creation. To achieve its objectives, the NTSS focuses on

domestic tourism with the intention to increase the number of domestic trips. Regional tourism is also being targeted with South Africa looking to take advantage of hitherto untapped markets such as outbound tourists.

This strategy represents government's commitment to intelligent planning and policy formulation. It was developed over two years in close collaboration with local and provincial governments, an advisory panel of top industry minds, representatives of various professional bodies, academia, tourism marketing agencies, civil society and the broader public.

The NTSS is a document that the entire sector is committed to and includes coordinated and credible targets. The strategy rests on three pillars – driving the tourism economy, enhancing visitor experiences and ensuring sustainability and good governance in the industry.

Tourism Month

Tourism Month is celebrated annually in September and provides a heightened month-long focus on the importance of the sector to the South African economy. Tourism Month features themed activities that are aligned to the United Nations World Tourism Organisation's (UNWTO) World Tourism Day celebrations that take place annually on 27 September.

The theme for the 2020 Tourism Month was; "Tourism and Rural Development". Festivities for the 2020 Tourism Month were held throughout the country, some virtually, culminating with the World Tourism Day celebrations that were hosted in collaboration with SAT and Gauteng at Maropeng, Cradle of Humankind in Johannesburg.

Women in Tourism Programme

The Women in Tourism Programme is an initiative that propels and supports the development and empowerment of women in the tourism sector. Premised on the principles of respect; recognition; representation and reward, the programme integrates women from diverse backgrounds to converge on a set of common goals and interests that will ensure their success in the sector.

The programme serves as a mechanism to elevate the status of women in tourism by providing training, empowerment and networking opportunities that facilitate their competitiveness as entrepreneurs, professionals and leaders.

National tourism service excellence requirements

The national tourism service excellence requirements are aimed at improving and maintaining service levels at all service touch points in the tourism value chain as well as guiding the sector to achieve the NTSS objective of positioning South Africa as one of the top 20 global tourism destinations.

Previously, the tourism value chain in South Africa did not have integrated standards and norms, and this contributed to inconsistencies in service levels. The service excellence requirements provides a yardstick to be used by all tourism service providers to deliver quality service and experiences that equal or surpass world standards.

The South African Bureau of Standards developed the standards on behalf of the tourism sector and benchmarked them against international requirements. The requirements have four key focus areas, namely marketing, products, delivery of service, and monitoring and evaluation.

National Minimum Standard for Responsible Tourism (NMSRT)

Responsible tourism is a management strategy in which the tourism sector and tourists take responsibility for protecting and conserving the natural environment, respecting and conserving local cultures and ways of life, and contributing to stronger local economies and a better quality of life for local people. It includes providing better holiday experiences for guests and good business opportunities for tourism enterprises. The concept of responsible tourism is gaining ground as a newly emerging trend worldwide.

The Department of Tourism, in partnership with tourism stakeholders and the private sector, particularly accreditation agencies, developed the NMSRT. In doing so, South Africa has taken the lead on the continent by publishing a set of national minimum standards that are aligned with the International Organisation for Standardisation/International Electrotechnical Commission 17011. The NMSRT comprises 39 criteria divided into four categories, namely sustainable operations and management, economic criteria, social and cultural criteria and environmental criteria.

Other projects

Tourism Enterprise Development Programme

The programme is part of the greater objective of the revised NTSS 2016 – 2026 that seeks to ensure sustainable development and growth of tourism enterprises in a manner that facilitates inclusive participation, job creation and contributes to the competitiveness of tourism destinations. The programme provides training and support for emerging and existing tourism businesses to ensure their sustainability in the sector. The programme includes an incubator programme in Pilanesberg with 50 incubatees.

The incubator services are designed to address the identified needs of SMMEs. It will also ensure constant monitoring to be conducted by the Department of Tourism's Monitoring and Evaluation, and Enterprise Development units respectively. Guidelines for international tourists

Every international traveller to South Africa must have a valid passport and, where necessary, a visa. The Immigration Act, 2002 (Act 13 of 2002), stipulates that all visitors to South Africa are required to have at least one blank page (both back and front) in their passport to enable the entry visa to be issued. If there is insufficient space in the passport, entry will be denied. Enquiries may be directed to South African diplomatic representatives abroad or to the Department of Home Affairs in Pretoria. Visas are issued free of charge.

Visitors who intend travelling between South Africa and neighbouring countries are advised to apply for multiple-entry visas. Passport holders of certain countries are exempt from

visa requirements. Tourists must satisfy immigration officers that they have the means to support themselves during their stay and that they have return or onward tickets. They must also have valid international health certificates.

Visitors from the yellow fever belt in Africa and America, and those who travel through or disembark in these areas, have to be inoculated against the disease. Malaria is endemic to parts of KwaZulu-Natal, Mpumalanga and Limpopo. It is essential to take anti-malaria precautions when visiting these areas.

Foreign tourists visiting South Africa can have their value-added tax (VAT) refunded. VAT is refunded on departure at the point of exit. South Africa's transport infrastructure – airlines, railroads, luxury touring buses (coaches) and motor vehicles – is such that tourists can travel comfortably and quickly from their port of entry to any part of the country.

The South African Airways, as well as a number of international airlines, operate regular scheduled flights to and from South Africa. Several domestic airlines operate in the country. There are also mainline trains to all parts of the country.

The tourist accommodation industry in South Africa provides a wide spectrum of accommodation, from formal hotels to informal holiday flats and cottages, game lodges and reserves, guest houses, youth hostels and bed-and-breakfast establishments.

Tourist guiding

The Department of Tourism entered into an agreement with the CATHSSETA, seeking to prioritise tourist-guide training and development throughout South Africa.

The agreement also addresses areas of transformation within the tourist guide sector, as well as the maintenance of standards through quality training and effective skills development programmes aimed at existing tourist guides. The department engaged the Road Traffic Management Corporation to educate traffic officials, throughout South Africa, on how to enforce legislation pertaining to tourist guides. It works closely with the Department of Transport with a view to ensuring enforcement of tourist guiding issues relating to tour operators and related regulations in the National Land Transport Act, 2009 (Act 5 of 2009).

The Department of Tourism wants industry bodies that are committed to growing the tourist-guiding sector and elevating the profession to enter into formal agreements with stakeholder bodies that share the department's vision. It undertook a

process to review regulations in respect of tourist guiding. This included wide consultations with tourist guides and key stakeholders throughout the country to improve processes and systems to register tourist guides and ensure compliance within the sector. The department is working with provinces to establish a centralised database of tourist guides. Once a viable database is in place, the department will be able to engage other relevant authorities and government departments to ensure that the information received from the provinces is subjected to a vetting process as prescribed in the Tourism Act of 2014.

Training programmes for tourist guides taking place in provinces focus on skills development for existing tourist guides to make them more marketable and employable within the sector.

Tourism niche markets

Domestic tourism (Sho't Left)

The Sho't Left Campaign aims to promote a culture of local holiday travel, targeting ordinary South Africans and their families who have a desire to see more of the country but do not know where to go.

The Sho't Left Campaign was relaunched in 2007, challenging South Africans to "see your world differently", even when only visiting family or friends. The campaign is aimed at young upcoming individuals, couples and families.

Adventure tourism

The country's diverse terrain, together with an ideal climate for outdoor activities, makes it perfect for the adventure tourism niche market. Activities such as climbing, surfing, diving, hiking, horseback safaris, mountain-biking, river-rafting and just about any other extreme activity are supported by dedicated operators.

South Africa offers some of the best rock climbing and abseiling opportunities in the world. Those who prefer rivers have a choice of trips ranging from mostly scenic to Grade 5 white-water rafting. Opportunities for escorted or self-guided trips are also available.

For those who want to take to the skies, there are more than 100 listed paragliding or hang-gliding launch sites as well as numerous lesser known sites. There are also many opportunities for helicopter rides, balloon and microlight flights, aerobatics and skydiving. Thousands of kilometres (km) of

hiking trails wind through the country in desert, forest, mountain or coastal terrains, many with adjacent mountain-biking trails.

In addition, South Africa offers a wide variety of horse trails through vineyards, on beaches and in the mountains. For the more adventurous there are also horseback safaris in game reserves. The 216-metre (m) Bloukrans Bridge, on the border of the Eastern and Western Cape, offers the highest commercial bungee jump in the world.

Business tourism

South Africa remains among the top long-haul business events destinations in the world and is the premier business events destination in Africa.

Government recognises business events tourism as an area with significant growth potential and has therefore established the South Africa National Convention Bureau (SANCB) to further promote growth in the conferencing industry. The SANCB is tasked with coordinating national bidding, undertaking research and collaborating with city and provincial convention bureaus and the business events industry to present a united front for destination South Africa.

Cruise tourism

The Department of Tourism works closely with the cruise line industry to ensure that packages and excursions are developed and that passengers are encouraged to visit the country's shores, enjoy what it has to offer and inspire other travellers to visit South Africa.

Cultural tourism

Heritage and cultural tourism is the fastest-emerging competitive niche within domestic and international tourism markets. The National Heritage and Cultural Strategy is aimed at guiding the integration of heritage and cultural resources with mainstream tourism. It is set to stimulate sustainable livelihoods through heritage and cultural tourism products, as well as to diversify the sector and raise awareness of heritage and cultural resources.

South Africa's diversity is reflected in its cultural tourism, with many destinations commemorating the past. These range from the ancient nomadic San culture to European settlement, apartheid rule and the Struggle for political freedom.

Cultural tourist destinations include the following:

- Ukhahlamba-Drakensberg Park in KwaZulu-Natal, a home

to the ancient rock art of the San.

- Cradle of Humankind near Johannesburg, the richest hominid fossil site in the world.
- Mapungubwe in Limpopo, one of the richest archaeological sites in Africa, where an advanced South African culture prospered between 1 200 AD and 1 270 AD.
- Soweto's Heritage Trail, a reminder of the events that characterised South Africa's liberation Struggle, such as the student uprising on 16 June 1976.

Many cultural villages have been established throughout South Africa to reflect the different cultures and traditions of the country's people.

Medical tourism

South Africa has emerged as a medical tourism destination of choice for travellers from other African countries as well as further afield; and the industry is proving to have extensive growth potential. Most medical tourists come to South Africa for cosmetic surgery, but the country's skilled surgeons can also perform organ transplants, cardiac, orthopaedic and obesity surgery, and dentistry.

Nature-based tourism

South Africa's fauna and flora, and varied landscapes have enormous recreational value and attract several million tourists each year. Protected natural areas serve not only to maintain biodiversity, but sustainable visitor access to these areas adds economic, recreational and aesthetic value to that which is being conserved within their borders. It also helps to preserve a wealth of traditional indigenous knowledge related to biodiversity, which is in itself a tourism resource.

South Africa has 20 national parks as well as numerous private game farms and nature reserves. Four of the country's United Nations Educational, Scientific and Cultural Organization (UNESCO) world heritage sites are natural sites, while one is a mixed cultural/natural site. These are the Cape Floral Region, the iSimangaliso Wetland Park, the Vredefort Dome, Barberton Makhonjwa Mountains and the uKhahlamba Drakensberg Park.

South Africa's popularity as an avitourism destination is due to the large number of birds, endemic species and major bird habitats. Birdlife South Africa, the country's national birding organisation, has more than 5 000 members and in more than 40 bird clubs nationwide.

Rural tourism

The National Rural Strategy is aimed at creating community-driven bed-and-breakfast operations, catering for international and domestic tourists. In supporting the geographic spread of tourism and in particular tourism growth in rural areas and enhancing the supply of rural tourism products, the Department of Tourism is focusing on rural communities.

Culture and heritage products are the fastest emerging competitive niche offerings in the domestic and international markets. Sustainable development will be achieved if the people, whose land, culture and natural resources are used for tourism, benefit from such use in a meaningful way.

Sports tourism

More than 10% of foreign tourists come to South Africa to watch or participate in sports events, with spectators accounting for 60% to 80% of these arrivals. The world-class sporting events on South Africa's annual calendar include:

- the annual Cape Argus Cycle Race, which caters for 35 000 people riding and pushing their bikes over a 10-km course;
- the Midmar Mile in KwaZulu-Natal, which attracts 18 000 open-water swimmers annually; and
- the Comrades Marathon.

The Sports and Events Tourism Exchange is the only event of its kind in Southern Africa and provides a platform that brings together businesses from the sports, events and tourism industries.

Township tourism

Township tours have the potential to present South Africa's culture and heritage, and the Department of Tourism plans to develop packages to achieve that goal. Government wants to capitalise on job creation opportunities in this sector.

Wine tourism

Wine tourism is growing fast worldwide and plays an especially important role in South Africa with its centuries-old reputation for making high-quality wine. South African's wine tourism has been rated among the best developed in the world.

The country's vineyards are mostly situated in the Western Cape near the coast. All South African wine routes fall under the auspices of the Wine of Origin Scheme. Stylistically, South African wines fit somewhere between Old World and New World.
